Java Backend Developer | Spring Boot | REST APIs | 6+ Years Experience | Returning Professional (Career Break)

Professional Summary

Java Backend Developer with 6+ years of experience in building enterprise applications in Banking and Insurance domains. Strong expertise in Core Java, J2EE, SQL, and SOAP-based Web Services.

Oracle Certified Professional with hands-on experience across the Software Development Life Cycle (SDLC), including design, development, testing, and production support.

Currently upskilling in Spring Boot, REST APIs, and Full Stack Development. Returning to the workforce after a planned career break with updated technical skills and a strong commitment to delivering scalable and high-quality solutions.

Technical Skills

Languages: Java, SQL, PL/SQL
Frameworks: Spring Boot (Hands-on), Wicket
Technologies: J2EE, Servlets, JSP, JDBC, EJB, JMS
Web Services: SOAP (JAX-WS, JAX-RPC)
Databases: Oracle, SQL Server, MySQL
Tools: Eclipse
Application Servers: WebSphere Application Server
Version Control: Git, RTC, StarTeam
Methodologies: Agile (Scrum), Waterfall

Upskilling

- Spring Boot (Hands-on Project Experience)
- REST APIs Development
- Microservices Architecture (Basics)
- Angular / React.js (Basics)
- Git (Version Control – Hands-on)

Professional Experience

Tata Consultancy Services (TCS)

IT Analyst / Java Backend Developer
Jan 2010 – Apr 2016

Client: Citi Bank

Project: Sales Offer Management (SOM)

- Developed and maintained backend services for credit card offer targeting system, improving campaign processing efficiency
- Configured and managed campaigns using Pega CDM
- Worked on reporting portal maintenance and issue resolution
- Resolved production issues involving Unix scripts and SQL queries
- Collaborated with cross-functional teams for deployments and enhancements

Tech Stack: Java, Oracle, Unix, Pega CDM

Client: United Services Automobile Association (USAA)

Project: Phase Replacement System

- Contributed to replacing legacy brokerage system with new vendor platform
- Developed modules for real-time and batch money movement processing
- Deployed applications on WebSphere Application Server
- Performed unit and integration testing
- Maintained code quality and participated in release activities

Tech Stack: Java, J2EE, EJB, JDBC, JSP, PL/SQL, DB2, Wicket

Client: United Services Automobile Association (USAA)

Project: Payment Card Tokenization

- Developed secure web application for payment card data handling
- Implemented encryption/decryption for sensitive card data
- Developed web services for payment card token generation
- Ensured data masking and compliance with security standards
- Supported full SDLC from design to production release

Tech Stack: Java, EJB, Web Services, Oracle, PL/SQL

Client: United Services Automobile Association (USAA)

Project: IMCO-UMA/UMH Acquisition

- Developed enterprise modules for portfolio management system
- Built UI using PS framework following MVC architecture
- Worked on backend services using Java, EJB, and Oracle
- Deployed applications on WebSphere server
- Supported testing, release, and production activities

Tech Stack: Java, PS framework, EJB, Oracle, XML

Client: United Services Automobile Association (USAA)

Project: Launch New Mutual Fund

- Developed application features to support new mutual fund offerings
- Built and deployed web modules using JSP and Servlets
- Participated in testing and release cycles

Tech Stack: Java, JSP, Servlets, Oracle, EJB

Project (Upskilling)

Online Learning Platform (Spring Boot & Angular)

📎 **https://github.com/kspoonkodi-dev/springboot-angular-project.git**

- Developed a full-stack application using Spring Boot and Angular following MVC architecture and REST API design
- Integrated backend APIs with Angular frontend for seamless data flow
- Implemented role-based authentication and authorization using Spring Security with JWT
- Designed and developed RESTful APIs for course and user management following best practices for scalable backend design
- Designed and implemented layered architecture using Controller, Service, and Repository patterns
- Integrated MySQL using Spring Data JPA

- Applied exception handling and validation mechanisms to ensure robust API performance
- Tested APIs using Postman

Tech Stack: Angular, Java, Spring Boot, Spring Security, REST APIs, MySQL

Certifications

- Oracle Certified Professional, Java SE 6 Programmer
- Oracle Certified Professional, Java EE 5 Web Component Developer
- Oracle Certified Expert, Java EE 6 Web Services Developer
- Java Full Stack Development Certification — Her Second Innings *(Ongoing)*

Education

- Master of Computer Applications (MCA)
- Bachelor of Science in Computer Science

Career Break

2016 – 2025

- Took a planned career break for family responsibilities
- Actively upskilling in Java Full Stack Development
- Completed hands-on project using Spring Boot and Angular
- Preparing to re-enter the workforce with updated technical skills and practical experience

Key Strengths

- Strong backend development experience
- Solid understanding of enterprise systems
- Quick learner with focus on modern technologies
- Good problem-solving and debugging skills
- Experience in production support and issue resolution
